# Archive Project Option

- Enter an appropriate archive name. You can rename it later if required
- Tick the "Include configuration settings" and "Include run results" checkboxes
- Click on OK

- A message box will appear after a successful workspace archiving

- The archive file size will be a few megabytes (MB) in size. In case it is hundreds of MB in size, please delete any simulation waveforms that you may have saved in the workspace folder, and try to archive the workspace again
- If you need to test the archived workspace, please extract the folder from the archive before opening the project in Vivado. Errors will happen if you do not extract the folder
